

OPEX CONSULTING GROUP

Technology Solutions

We provide technology solutions to improve your company's productivity and competitiveness in order to meet your customers' expectations at all times. Our Technology Solutions play a key role in digitalization, Industry 4.0 and Smart Factory. While helping you decide your investment in the best hardware and software, we also help to prepare your people with the right knowledge, right skill and right mindset to embrace the new technologies. Along the way, we will also review your processes and prepare them in the new environment.

LEAN SIX SIGMA: Customized training and consultation to help your organization deploy sustainable CI program, integrating the powerful tools of Lean Six Sigma, with proven track record of financial benefits and certification of Black/Green Belts.

INTEGRATED BUSINESS PLANNING: Integrate Supply Chain Management, Lean Manufacturing and Six Sigma into your company's business strategy. Use S&OP to manage and balance demand and supply to meet company strategy and KPIs.

Training & Consultancy

Greenfield Startup

Starting up a greenfield project or operations is always tricky and, often, disastrous, if not managed properly. With numerous experience in Singapore and Indonesia, we provide one-stop-shop consultancy service to clients from ideas to operational executions.

- *Establish legal entity*
- *Setup premise and infrastructure*
- *Operations and manpower planning & execution*

Our Strength

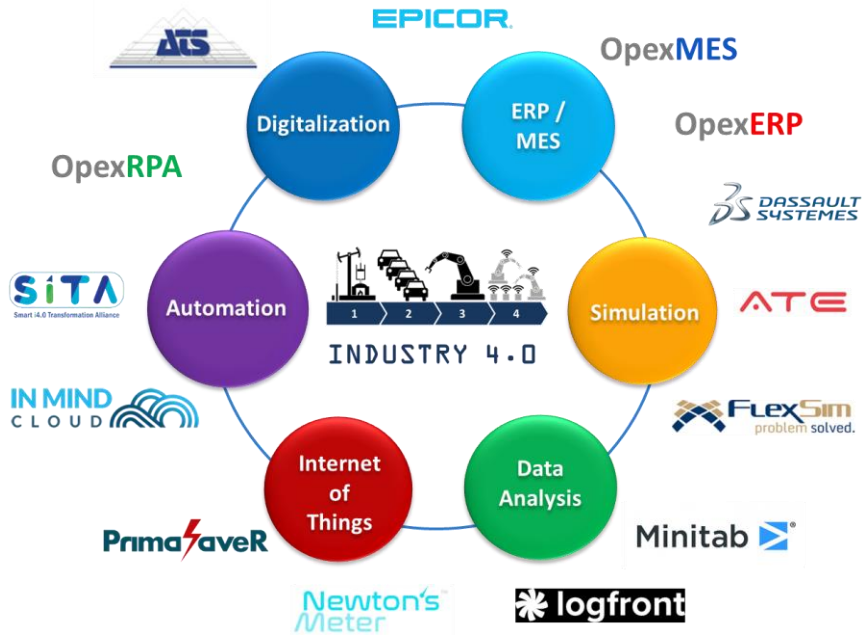

Customize: We believe one size does not fit all. Different organizations face different problems and challenges. We conduct comprehensive diagnostic assessment and customize our services and programs to suit your needs.

Experience: We have proven track record of over 20 years of hands-on experiences, range from manufacturing to service industry.

Localized: We speak the local languages. We have deep understanding of the needs of clients in Singapore, Indonesia, the Philippines and South East Asian countries.

Our Partners
