

Pemantau Tekanan Darah Automatik / Automatic Blood Pressure Monitor

Model: CH155 

Product Reg. No.: GB39668337717

Pengesan Pergerakan / Movement Detection

Pengesan pergerakan membantu mengingatkan pengguna untuk tidak bergerak semasa pengukuran. Ikon pengesan pergerakan muncul sekiranya pergerakan badan dikesan semasa dan selepas setiap pengukuran. /

The "Movement Detection" helps reminding the user to remain still and is indicating any body movement during measurement. The specified icon appears once a "body movement" has been detected during and after each measurement.

Teknologi Real Fuzzy / Real Fuzzy Technology

Teknologi Real Fuzzy menentukan tekanan kaf yang ideal berdasarkan tekanan darah sistolik dan ukuran lengan. Pengguna tidak lagi perlu menetapkan tahap inflasi sebelum pengukuran. Teknologi ini menghilangkan rasa ketidakselesaan pada lengan yang berlaku apabila pengaturan inflasi tinggi dan juga mencegah pembacaan tidak tepat disebabkan oleh tahap inflasi kaf yang salah.

Real Fuzzy Technology determines ideal cuff pressure based on one's systolic blood pressure and arm size. Users no longer need to pre-set the inflation level before measurement. The technology eliminates arm discomfort through unnecessary high inflation settings and also prevents inaccurate readings caused by erroneous cuff inflation levels.
